NSAC History and Support

The Nova Scotia Agricultural College (NSAC) is an internationally recognized and respected teaching and research institution, providing quality education since 1905.

NSAC has always been a vital partner with the landscape horticulture industry, in meeting the growing demand for qualified landscape horticulture professionals.

NSAC will partner with its industry stakeholders to develop the Atlantic Centre for Landscape Excellence and deliver a broad spectrum of post-secondary and industry-specific training initiatives.

Landscape Nova Scotia
 Landscape Newfoundland and Labrador
 Atlantic Region Certification Committee
 Canadian Nursery Landscape Association
 Nova Scotia Agricultural College
 Nova Scotia Federation of Agriculture

The Need for ACLE

- Addresses the continuing skilled labour shortage in Atlantic Canada, with the landscape horticulture trade in need of employees to meet the demand.
- Fulfills industry requirement for training in the months from fall to spring. This facility would allow this training to take place indoors during the typical industry downtime.
- Offers our students, industry members and industry stakeholders streamlined and relevant skills training solutions and opportunities!
- Supports the Landscape Horticulturist Apprenticeship and the practical training/testing.
- Fosters a networking partnership between the college and the industry to host joint events/educational sessions by offering central training or meeting facilities to industry related associations/groups.
- Expands opportunity for events such as field days, equipment/product demonstrations, skill competitions, public open houses and other networking activities.
- Allows for the potential expansion of a high school focused training program.
